SUMMARY

Business Operations and Analytics professional with experience spanning data analysis, software and AI-enabled solutions, executive operations, reporting, workflow coordination, and stakeholder management. Skilled in using data, technology, and structured processes to improve operational visibility, support decision-making, and drive execution. Experienced in working across technology, education, nonprofit, and professional services environments, with hands-on experience in SQL, Python, R, Excel, Power BI, Tableau, and AI-enabled productivity and workflow tools.

EXPERIENCE

Executive Assistant/Admin · Office of the CEO — Apr 2025 – Sep 2026

- Central coordination point for a CEO-level executive across four organizations: calendar, travel, external stakeholders, and follow-through on commitments until closed.
- Administrative coordinator for a school on the director's behalf: fee administration aligned with the school portal, parent communication, staff conduct and daily operations.
- Ran recruitment coordination for a manufacturing company, from CV intake through interview scheduling, offers and onboarding documentation.
- Produced a weekly task and status report giving the executive one view of progress across all organizations.
- Kept income, expense and donor records for two initiatives and ran their monthly newsletter; used AI tools to speed up drafting and reporting.

Data Analyst · Spearhead Software Limited — Jun 2023 – Dec 2023

- Gained hands-on exposure to model training and prompt engineering while the company built an AI-enabled data analysis product for banks.
- Handled marketing support for the company's software solutions: built and filtered a list of 500+ prospects with LinkedIn Sales Navigator for outreach.

Data Community Lead (Volunteer) · HerTechTrail — Apr 2024 – Mar 2025

- Led a community of 500+ women in tech, planning programs and initiatives with partner leads, and mentored aspiring analysts.

Medical Laboratory Scientist · Hospital laboratories — Earlier career

Performed diagnostic tests on blood, tissue and body fluids, and documented and reported accurate results to physicians and healthcare teams.
